Dear Prof (Dr) S A Patil

Greetings!!

This is with reference to our telephonic conversation held last week regarding Skill Assessment & Placement Opportunities.

IndiaFirst Robotics Pune is pioneer in imparting training students from engineering streams of both Degree & Diploma on various programs on Industrial Automation & Robotics.

We are keen to hand hold students on skill development and placement from all streams such as Electronics, ENTC, Mechanical, Instrumentation, Civil, MCA & MBA.

The attached proposal speaks about it in detail and the process how it works is detailed below:

The steps involved are -

1 Assessment of students based on online test of 120 minutes that generates a scientific report about profile is each student on

A. Technical strength domain vase with sub domain of his liking in relevant areas of domain

B. Overall personality includes PD aptitude behavior strengths and weakness

C. Suggests which area s/he is strong in and can look for as a career

This 15-18 pages transcript of each students prompts his/her areas and allows us to map his profile with respective recruiter in line with Job Description they have defined.

Post assessment company representatives visit campus for shortlisting the candidates and for respective alignment versus other companies looking for similar profile within 3-5 companies looking for fresher's.

The CTC ranges between INR 1.20 to INR 2.80-3.00 with no criteria of 60% all throughout nor any backlog except year down.

All these profiles are for entry level opportunities. We expect minimum 150 students to take the test including even those having any back log or ATKT except Year Down (YD).

We shall execute an MoU with commitment of companies or opportunities each stream.

We look forward for your consent in this regards.

Thanks & regards

Dear Sir/Madam,

As we have planned a pool campus drive of Think & Learn Pvt. Ltd. on 2nd August @ our college, we are getting a poor response for the same though package is too high.

It's may be because of Sales and Marketing Profile.

So we have cancelled the pooled drive.

Regret for inconvenience.

## How India will hire and get hired in 2015

Last updated on: December 23, 2014 10:16 IST

The New Year, like 2014, will see brisk hiring. But, specialisation and strong domain skills will decide who gets hired.

- Under-30 candidates were preferred by 72 per cent of employers surveyed
- The share of freshers in the total job pie in the next five years will come down from 70-80 per cent to 50-55 per cent
- Domain/functional expertise will be a key differentiator for employers while hiring
- Only 37 per cent of the 328,000 aspirants -- undergrads, post grads, BComs, BAs, BSes and vocational course students -- who took the Wheebox Employability Skills Test emerge as 'employable resources'
- Starting salary aspirations have jumped from Rs 2 lakh to Rs 2.6 lakh per annum
- Jobs in the core engineering sector -- oil, power and minerals -- and sales jobs in retail, hospitality, IT and BFSI space will be in great supply
- The percentage of candidates hired using internal referrals and social media will almost double

W/TB  
23/12/14  
JUL

**T**hese are the major findings of India Skills Report 2015, compiled after surveying 125 employers across India to understand their hiring needs.

Based on these needs, an assessment was made of some 328,000 test takers across 29 states and seven Union Territories to find out if they make the grade as 'employable resources'.

India Skills Report 2015 is the joint initiative of Wheebox (a skill assessment company that assessed 328,000 students across India), PeopleStrong HR Services Pvt Ltd (a multi-process human resource outsourcing and technology company with specialisation in recruitment process outsourcing), and LinkedIn, in association with industry body Confederation of Indian Industry (CII).

"For the first time we have tried to bring the supply (*of job aspirants*) and demand (*employers*) side on the same platform," said Kiran Kumar, founding member and business head, PeopleStrong.

Those who scored 60 per cent or more in this test are considered employable resources; 37 per cent of those assessed hit the bull's eye, compared to 33.5 per cent last year.

"There is more acceptance of an assessment like this," Kumar says, pointing to an almost 250 per cent jump in the number of assesses who took the Wheebox Employability Skills Test (WEST) this year.

Compared to just 100,000 aspirants last year, 328,000 under-grads and post-grads studying engineering, MBA, BA, BSc, BCom, ITI and vocational courses, took the WEST conducted between August 4 and October 2014.

#### The WEST tested students for four competencies:

- English as second language
- Aptitude which is problem-solving and numerical skills
- Basic IT literacy
- Behavioural or psychometric test that included learning agility, adaptability and interpersonal skills

"The fifth test, the functional test, was optional," says Nirmal Singh, founder and CEO, WheeBox. "If you are a BE Mechanical then this test would test your knowledge of mechanical engineering. Almost 98,000 students took the fifth option," Singh adds.

## What's in it for freshers?

Both Kumar and Singh believe that while hiring in 2015 will see a jump of 18-23 per cent, hiring of fresh graduates will not be as euphoric as in the last four years.

"The reason is that as a lot of sectors and industries employ high-end technologies to boost efficiency and productivity, they will tend to hire people with ready-made skills instead of looking out for fresh hands," explains Kumar.

"Freshers, who would make 70 to 80 per cent of the hiring pie, will see this number drop. It will stabilise at about 50 to 55 per cent in the next five years," he adds.

Singh says that hiring freshers in 2015 will be better than 2014, but "we won't see the euphoria witnessed in 2010 and 2011 when companies went all out to hire freshers."

Having said that, companies like Infosys have reported more hiring of fresh grads this year as compared to the previous year, he said, emphasising that freshers too will have a productive 2015.

"Engineers and students who have done general purpose graduation (*like BA, BCom and BSc*) will definitely be in demand in 2015," Singh adds.

Both the experts are sure that sunrise sectors like e-commerce will emerge as a job engine for freshers and those with strong domain expertise.

Companies like Flipkart and Snapdeal will be scouting for fresh as well as skilled talent to build software products to match their international competitors, they say.

Most e-commerce companies have raised fresh funds in the last six months and are flush with money, which augurs well for the job market in 2015.

While job creation in IT services, IT infrastructure services and software services will stabilise, hiring in the e-commerce segment will surge in the next couple of years, predicts Kumar of PeopleStrong.

In 2015, the e-commerce sector, which is currently in a sweet spot, can easily absorb 40,000 freshers but that will depend on how swiftly the dynamics of e-commerce business change in India.

## **Jobs and skills that will be in demand**

Expecting the government to unleash a string of critical reforms in the area of mining of natural resources, power and finance, companies operating in the core engineering sector, retail, hospitality, IT and BFSI (*banking, financial services and insurance*) will emerge as leading employers too.

"The topmost jobs will be in the core engineering sector and sales jobs in retail, hospitality, IT and BFSI space," says Singh of Wheebox.

Kumar of PeopleSoft reckons that while the big five -- TCS, Infosys, Wipro, Cognizant, HCL Tech -- will continue to hire, they will hire fewer people, but of better quality and skills.

"As more and more companies scale up and upgrade their IT operations, IT infrastructure and related services, they will demand high-end engineers who could help them emerge at the top," says Kumar.

Specialisation and superior skill sets will thus play a key role in the job market in 2015.

Employability skills that companies are looking for are: good behavioural skills, domain/functional expertise (*a welder should know how to weld, or an MBA in finance should be able to read balance sheets, says Singh*), learning agility, inter-personal skills and communication skills.

'Without learning agility these resources won't be of any use to us', most employers told the survey team.

'Learning-agility', Singh says, refers to the ability of a hired resource to quickly cope with an employer's internal training programmes.

## **Advice for job seekers**

Get some hands-on job experience, Kumar and Singh advise fresh graduates, or those who are in their final or pre-final year of college.

"Traditional education is happening in colleges and campuses. It is important for students to equip themselves with specialised skill sets to take advantage of the rapidly evolving jobs segment," says Singh.

Singh believes that an internship or apprenticeship would strongly differentiate the winner from the loser in the job race next year.

Interestingly, the Indian Skills Report 2015 notes that the talent pool in India is warming up to the fact that an apprenticeship or internship is a must before they actually get a full-time job.

"Call it apprenticeship, on-job training or internship, compared to 55 per cent who showed interest in an apprenticeship last year, the number this year has swelled to 73 per cent," observes Kumar.

"I have been saying this in all fora that one's first job should be as an apprentice or intern. Most colleges have been avoiding this, but have now realised that there is no other way out," says Singh about the change in attitude of students and colleges.

"Internships help bridge the gap between academia (*talent supply side*) and companies (*talent demand side*)," he says.

However, Singh says that equal emphasis must also be laid on starting-up and enterprise. "We must encourage students to take up entrepreneurship considering the talent pool that we have in India," he says.

"If one has to point out one factor that has emerged prominently in this survey it is this: Domain knowledge and personal skills cannot be neglected anymore."

### **The year of social media**

Call it a cost-cutting exercise but the latest trend in hiring, the Indian Skills Report 2015 reveals, is that employers will bank heavily on internal referrals and social media (*Facebook, Twitter, LinkedIn*) to hire resources.

"Companies will use internal referrals and social media more than job portals or recruitment consultants," says Singh of Wheebox.

In fact, a closer look at the report shows that the reliance of companies on internal referrals and social media to hire talent in 2014 has been phenomenal.

Just to give you a simple example, if all the 125 companies combined together hired six people via social media in 2013, then in comparison, they hired 12 people via the same route in 2014, a phenomenal jump of 100 per cent.

What's more, this trend will become more prominent and reliable as we move into 2016 and 2017.

"Internal referrals and job portals will help these companies hire a bulk of their requirements going ahead," Singh adds.

Ericsson is the world's leading provider of technology and services to telecom operators. Ericsson is advancing its vision of being the "prime driver in an all-communicating world" through innovation, technology, and sustainable business solutions.

We are bringing the opportunity to be a part of the leading band in the 1<sup>st</sup> Level Assurance department of Ericsson India Global Services.

- 1st Level Operations service function is an entry point for incident, technical escalation and responsible for the execution of proactive and reactive maintenance activities to ensure that services provided to customers are continuously available and delivered at standard performance levels.
- Overall network monitoring is done by 1st Level Assurance. Any event that leads to network service incident is categorized, prioritized assigned to relevant teams for resolution. Further follow ups for resolution is also performed by this function. This function not only monitors the events that lead to service discontinuity, but also the events that may later lead to network service incidents. Additionally this function also monitors, in some cases, performance metrics of the network and then follow up for resolution.
- It performs continuous resource status and performance monitoring to promptly detect possible failures. It is responsible to handle trouble reports or calls received from the Operator's Customer Care Center or Service Desk (or from internal Service Desk) and ensures 1st level restoration of incidents.
